Реле уровня для токопроводящих жидкостей серии DNC/PNC

 **tecfluid**

LEVEL RELAYS FOR CONDUCTIVE LIQUIDS WITH DC OR AC POWER SUPPLY DNCA / DNCB, PNCA / PNCB SERIES

Benefits

- Simple, reliable and economical
- DC or AC power supply
- Dual relay contact output
- Maximum and/or minimum level control
- Sensitivity: 8..45 KOhms
- Voltage (probes): 6.2 VAC
- Current 3.2mA
- Fill or empty function

Functioning

Fill function : Maximum and minimum level control. The relay is activated when the liquid level is below the minimum control electrode and it is deactivated when the level is above the maximum control electrode.

Drain function : Maximum and minimum level control. The relay is activated when the liquid level reaches the maximum control electrode and it is deactivated when it is below the minimum control electrode. For this option, a bridge must be made between terminals 5 and 6 (PNCA/PNCB) or between Y1 and Y2 (DNCA/DNCB).

Technical data

LED indication: Voltage present: Green
Relay On: Red

Sensitivity range: Adjustable from 8 to 45 KOhms

Probe consumption: 3.2 mA (short-circuited) at 6.2 VAC (VPEAK)

Probe cable characteristics

Normally 1 to 2.5 mm cables are used 2-section with good insulation and unshielded. In some installations, when the power line and the probes are parallel in the same tube and with long distances, it is recommended to use a shielded cable, connecting the braid to the common terminal of the probes, corresponding to the reference (ground). If the tank is not conductive, an additional probe must be provided to connect the reference (ground) to the common terminal of the probes.

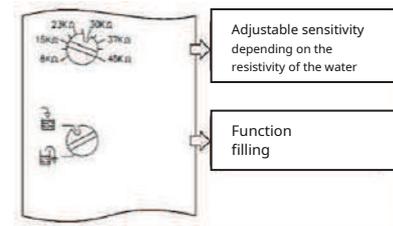

Cable resistance: > 200KΩ Probe
cable length: < 100 meters

Housing	Function	Exit	Tension	Range
P: Plug-in D: DIN rail	Level control with DC power supply	A: 1 NO B: 2 NO	712 12 VDC	45K 8KΩ..45 KΩ

Technical data

	PNCA / PNCB	DNCA / DNCB
Neutral phase voltage	300V	
Overvoltage category	III	
Impulse voltage	4kV	
pollution degree	2	3
Degree of protection	IP 20 B	IP20
Approximate weight	250g	280g
Storage temperature	- 50...85°C	
Temp. Operating	- 20...+50°C	
Humidity	30...85% RH	
Housing	Cycoloy, light gray	
Base	Lexan, light gray	-
LED viewfinder	Lexan, Clear	
Buttons, terminals and base	Technyl, dark blue	
Basic terminal blocks	Nickel-plated brass	-
Screw terminals	-	Brass

Standards: Designed and manufactured under EEC regulations.
 Electromagnetic compatibility, directives 89/366/CEE and 92/31/CEE.
 Electrical safety, directive 73/23/CEE.
 Plastic materials: UL 91 V0

Dimensions

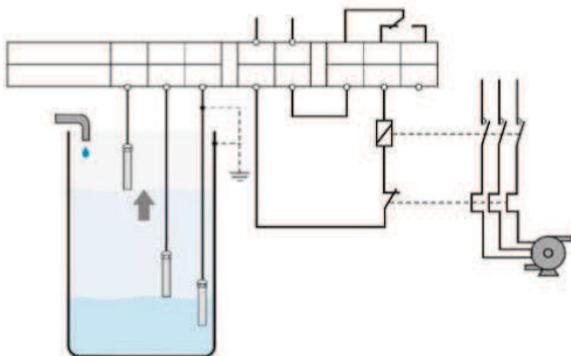

Examples of connections

Drain control

Selector in position 

The relay maintains the level between the maximum and minimum electrodes. When the liquid reaches the maximum electrode, the pump starts and will stop when the liquid drops below the minimum electrode.

Filling control

Selector in position 

The relay maintains the level between the maximum and minimum electrodes. The filling pump starts when the liquid is below the minimum electrode, and stops when the liquid reaches the maximum electrode.
